DESCRIPTION

INDUCED PLURIPOTENT STEM CELLS DERIVED FROM REPROGRAMMED HUMAN DERMAL FIBROBLASTS

Organism: Homo sapiens, human
Cell Type: Induced pluripotent stem cells
Source: Fibroblasts
Gender: Female
Age: 36 year-old
Family member: 1
Relation to proband: Proband
Delivery system: infection with Sendai virus
Reprogramming factors: Oct4, Klf4, Sox2, cMyc
Datasheet: available under request
